Best Practices WYSIWYG

(with inline image handling)

@jenlampton | http://www.jenlampton.com

I AM @jenlampton

I have been using Drupal since D4.7

I build Drupal sites for other people

I consider myself a developer

I AM @jenlampton

I have been using Drupal since D4.7

I build Drupal sites for other people

I consider myself a developer

I HATE WYSIWYG EDITORS

THERE'S A LOT TO COVER

- Drupal's Text Formats
  (Filtered HTML, Full HTML, etc)
- Drupal's Filters - PHP
  (line break, link, etc)
- WYSIWYG editors - JS
  (TinyMCE, CKEditor, etc)
- A whole lot of **configurations**

CONTRIB MODULES

- WYSIWYG API (http://drupal.org/project/wysiwyg)
- Better Formats (http://drupal.org/project/better_formats)
- IMCE (http://drupal.org/project/imce)
- IMCE Wysiwyg API Bridge (http://drupal.org/project/imce_wysiwyg)
- Insert (http://drupal.org/project/insert)
- Caption Filter (http://drupal.org/project/caption_filter)

IF THERE'S TIME

- Image Resize Filter (http://drupal.org/project/image_resize_filter)
- Filefield Sources (http://drupal.org/project/filefield_sources)
- WYSIWYG filter (http://drupal.org/project/wysiwyg_filter)

NOT COVERED

- WYSIWYG fields (http://drupal.org/project/wysiwyg_fields)
- EPSA Crop (http://drupal.org/project/epsacrop)
- Other awesome WYSIWYG modules
- Media (http://drupal.org/project/media)*
- ALOHA (http://drupal.org/project/aloha)**

DEMO (MY CODE)

- Drupal 7

  (the same principles apply to Drupal 6, but probably not to Drupal 8)*

- Admin Menu module

  (http://drupal.org/project/admin_menu)

- Custom sub-theme of Bartik

  (adds a style sheet: https://github.com/jenlampton/wysiwyg_theme)

DEMO (MY CONFIG)

Users

- A new role called 'editor'
- A new user called 'editor' in the editor role
- Permissions set accordingly for editors

Content

- Added an 'inline images' field to the Page type

  (field set to 'hidden' under display settings)

- New content type 'Icon'

  (inline images field aded, upload destination set to images/icons)

LET'S GO!
